

Bangladesh's hotels, one API away

From January 2027, travel platforms can search and book our 150 hotels directly.

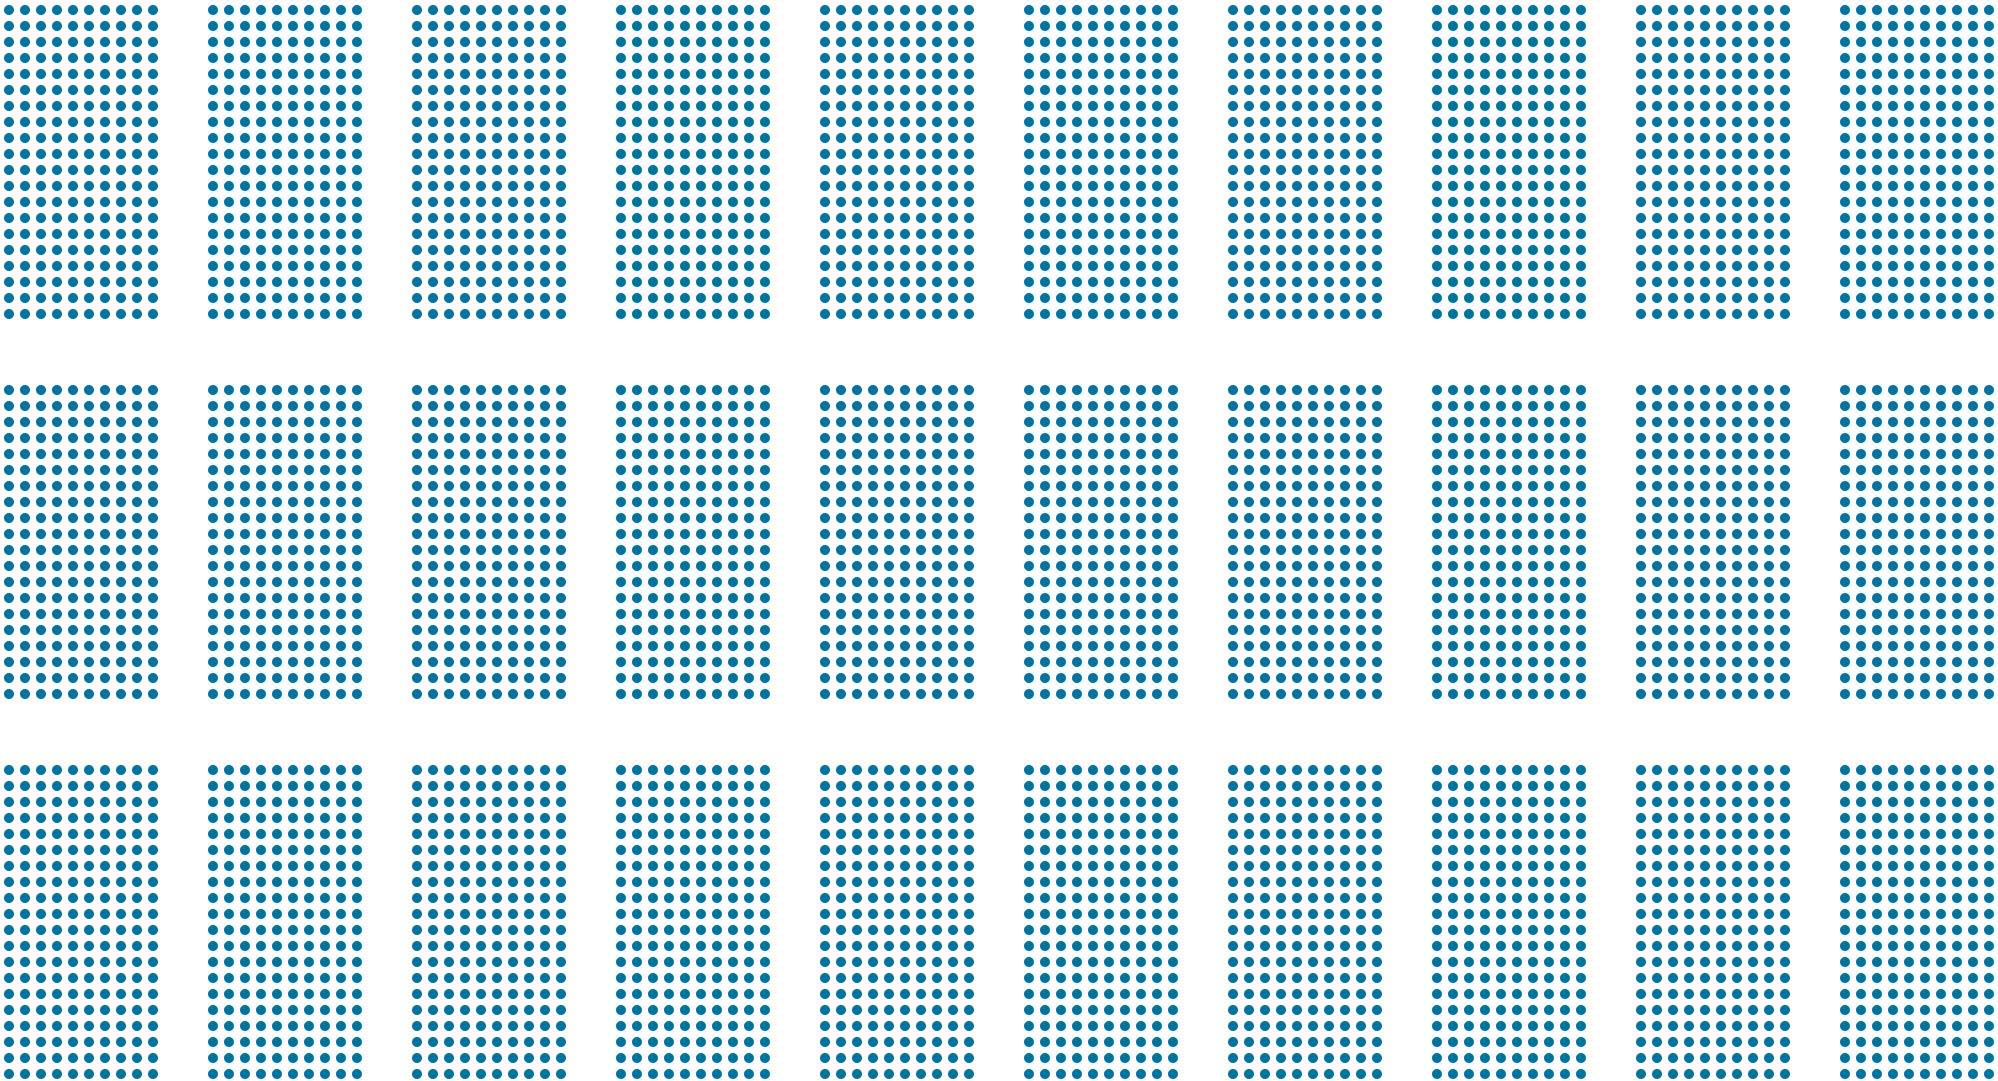

150

hotels in Bangladesh, each
under contract with us

6,000

room nights sold in a typical month

One month of sales. Each dot is one room night.

We agree every price with the hotel ourselves,
and we sell only to travel companies.

Many travel platforms only buy hotels through an API. Now we have one.

	Until now	From January 2027
Prices and rooms	Our team types every change into each partner's extranet.	Partners read live prices and rooms from our API.
Bookings	Each platform emails its bookings in its own format.	Partners book through the API and get an instant confirmation.
Who can buy	Platforms that only buy by API couldn't work with us.	Now they can.

Every partner reads from one system

150 hotels

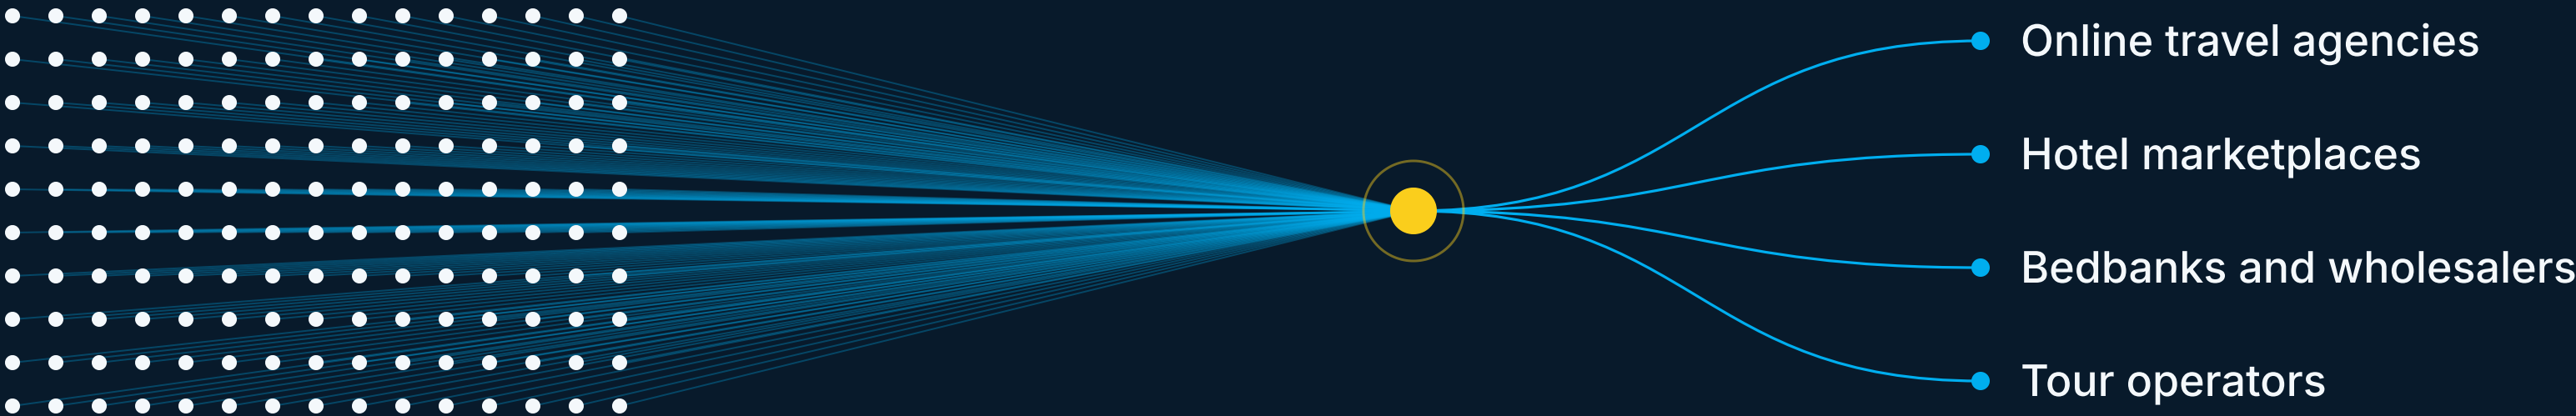

Each dot is a hotel we contract directly.

Tourifye

Holds every price, room count and booking.

Travel platforms

Read the same live data through one API.

One room count for everyone. When a room sells on one platform, it's gone from all of them.

A confirmed booking takes three calls

1 Search

Send dates and guests, and see every open room with its price.

2 Quote

Pick a room, and we hold its price for 15 minutes.

3 Book

Send the guests' names, and the booking is confirmed on the spot.

A real answer from our beta API.

All 150 hotels arrive in one standard format

Rooms	Named exactly as on Booking.com, so mapping is quick.
Rates	A price for every night and every number of adults.
Availability	Rooms left for up to 92 days, in a single call.
Cancellation	Every deadline is exact, in the hotel's own time zone.
Payment	Prices in US dollars. You pay us, and we pay the hotel.

Deluxe Double Room, two adults							
Sample hotel, 29 Oct to 4 Nov 2026							
	Thu	Fri	Sat	Sun	Mon	Tue	Wed
	29	30	31	1	2	3	4
Breakfast	\$60	\$65	\$65	\$60	\$60	\$60	\$60
Room only	\$52	\$52	\$52	\$52	\$52	\$52	\$52
Rooms left	4	4	3	3	4	4	4

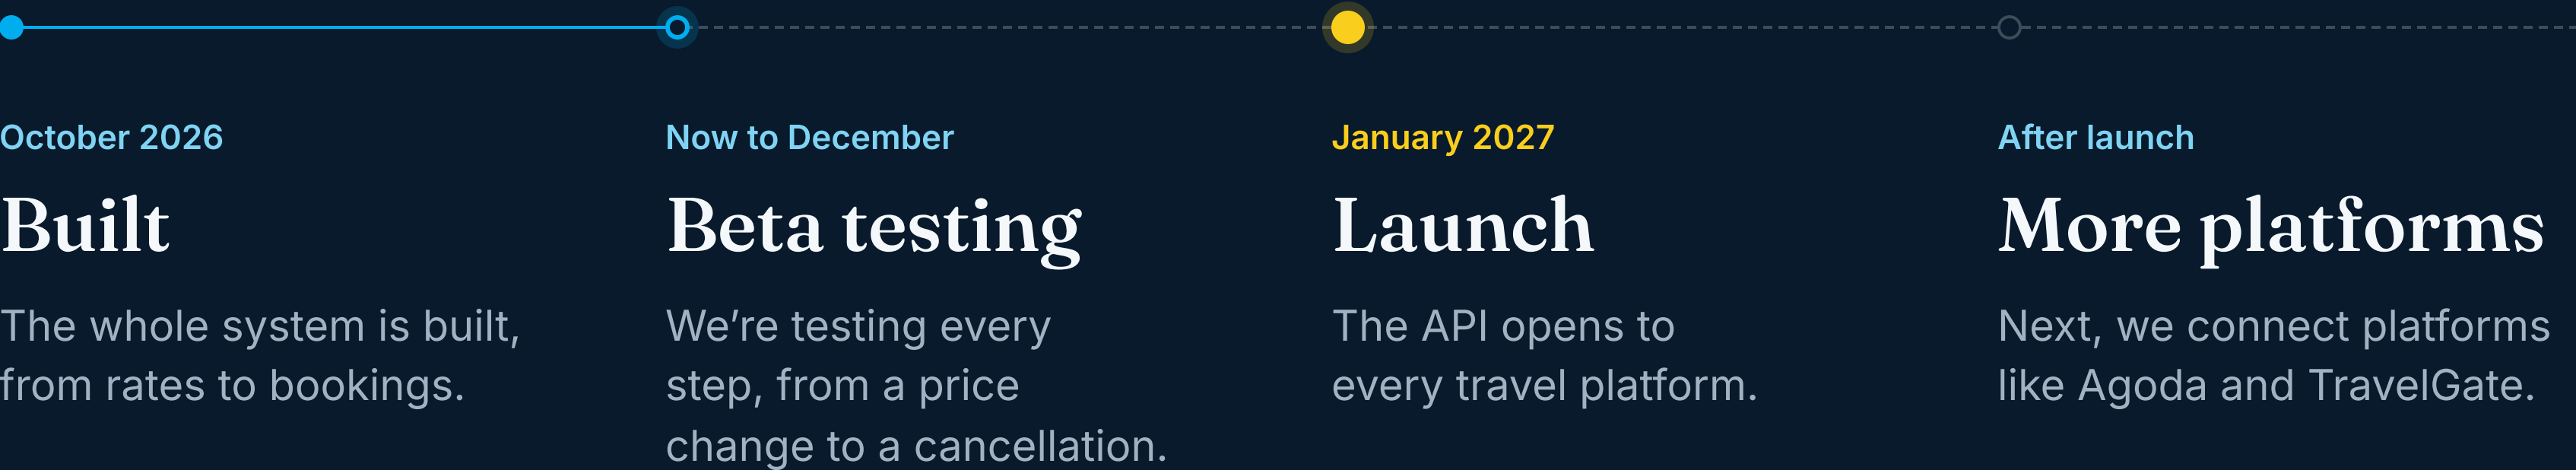

Our hotels get more buyers, with no extra work

They keep the same agreements and the same team.

Platforms that only buy by API can now book them.

One shared room count means rooms are never split between platforms.

In beta now, and open to platforms in January 2027

Be live from launch day

Write or call now, and our 150 hotels can be on your platform the day the API opens.
